ABSTRACT: *Cardiovascular diseases are a set of conditions that have negative effects on our cardiovascular system involving heart and blood vessels. The task of supplying oxygen & nutrients to different parts of our body is performed by cardiovascular system. The key objective of this study is to demonstrate the fact that being sick, diseased, or up to being dead is caused by interrupting or forcing to stop the normal (natural) automatic functioning of **Genome** in its individual genomic-thing. The contents of Figures and Tables in methodology section are designed to serve as evidential Results for the targetful strategy of this study. The contents of Figures & Tables in the methodology section are designed to serve as evidential Results. Cardiovascular system is synthesized by **Genome** for the task of supplying oxygen & nutrients to different parts of our body that are specialized for different interdependent functions and then removing metabolic wastes in the opposite direction. If cardiovascular system fails (due to diseases) to supply each of these tissues, organs, systems with oxygen & nutrients, they will be suffocated and starve to death, resulting in the death of the individual patient.*

INTRODUCTION

Cardiovascular diseases are a set of conditions that have negative effects on your heart or blood vessels. The heart is a muscle that pushes blood through your blood vessels to other functionally specialized organs in your body. The blood carries oxygen and nutrients [1 to 19]. Over time, blood vessels can collect fatty deposits made up of cholesterol. Cholesterol is a type of fat that your body needs, but having too much of it can cause a build-up on the wall of inside surface of your blood vessels where this kind of fatty acid deposit is termed **plaque**. Plaque makes your arteries narrow and stiff, limiting blood flow thereby resulting in a kind of impairment called **atherosclerosis**. If blood flow through coronary arteries to your heart is blocked, it causes a **heart attack** whereas if

blood flow through a pair of vertebral arteries & a pair of carotid arteries to your brain is blocked, it causes a **stroke**. A cardiovascular happening like a heart attack or a stroke is very serious, being a medical emergency. Cholesterol is a type of fat, produced by your liver and found in your blood. You have two kinds of cholesterol in your blood:- Low Density Lipoprotein (LDL) referred to as “bad” fat for it is harmful to your health, and High Density Lipoprotein (HDL) termed “good” fat as it is good to your health. Cardiovascular diseases (CVDs) are the set of leading cause of death globally. An estimated 17.9 people died from CVD in 2019 which represented 32% of all (total) global deaths. Out of that 32% of deaths caused by CVD, 85% occurred due to **heart attack** and **stroke**.

The key objective of this study is to demonstrate the fact that being sick, diseased, or up to being dead is caused by interrupting or forcing to stop the normal (natural) **automatic functioning** of **Genome** in its individual genomic-thing.

Methodology & Results

The contents of **Figures** and **Tables** herebelow are designed to serve as evidential Results in the targetful strategy of this study and that is why it is entitled **Methodology & Results** hereabove.

Discussion

As it can be seen from Table 2, **UK** has spectacularly been proved to be the top country in contributing **Greatest Scientists** of creating sciences for all human races of the world. The two major factors that enabled **UK** to be the best country in the entire world in contributing the largest number of **Greatest Scientists** in creating sciences are its:

► **Best Controlled Quality Education, and**

► **Best Quality Reputable Journals.**

The fact that **UK** is the best country in contributing the largest number of **Greatest Scientists** in creating sciences for all human races of the world is imparted by the set of **output** and the **countercheckable concreted evidences** about **UK's** being **superpower** in **Best Controlled Quality Education**, and in **Best Quality Reputable Journals**.

Since education is power, **UK** was enabled or capacitated to colonize many countries on the surface of Earth in the past human history because of its being empowered by **Best Controlled Quality Education** and based on that truth it had been stated as “the sun never sets on UK.” However, those colonized countries by **UK** are free at present. The phrase “the sun never sets on England” refers to the fact that the sun was always shining on at least one of the expanded British Empire’s historical territories or colonized countries that covered quarter (25%) of Earth’s land surface. Now, **Feleke’s Genomosphere** has covered 100% of Earth’s land & water surfaces, being termed **Ethiopian Empire of Genomosphere**. Thus, **the sun never sets** on **Ethiopian Empire of Genomosphere**. The Earth’s land surface is commonly divided into 7 continents: Asia, Africa, North America, South America, Antarctica, Europe, and Australia. The water surface of the Earth includes: lakes, rivers, seas, and oceans.

The **Supergreatest Scientist** in creating sciences (**Father of Genomic-things**) has been empowered by **Education** and he is the **Father of Genomosphere** that covers the entire world (planet Earth) with its inhabiting genomic-things of viroids, viruses and microscopic organisms up to angiosperms and humans forever with no rival and claimer.

Based on the definition of a genomic-thing:

.Genome synthesizes **itself & its individual genomic-thing using its energy-containing nutritive substances and minerals** as raw materials in **its aerobic** or **anaerobic compatible environment** [20 – 25]. The **Genome** of a single-celled zygote of *Homo sapiens* synthesized the cardiovascular system composed of organs such as heart and arteries by way of differentiation and functional specialization to perform the task of supplying oxygen & nutrients to different parts of our body and then to remove metabolic wastes in the opposite direction. All other functionally interdependent specialized cells for different functions are suffocated and starved to death if cardiovascular system fails to supply each of them with oxygen & nutrients [26 to 29]. Remember that a python kills a person and other large preys such as a goat & a cow within a few minutes by cardiac arrest before swallowing [16]. This is the very reason for why **cardiovascular diseases** are the 1st leading cause of human death in the world whereas the 2nd leading cause of death globally is **cancer**.

Conclusion

The reason for why **cardiovascular diseases** are the 1st leading cause of human death in the world, is because:

Cardiovascular system is synthesized by **Genome** for the task of supplying **oxygen** & **nutrients** to different parts of our body that are **specialized for different interdependent functions** and then removing metabolic wastes in the opposite direction. If cardiovascular system **fails** (due to **cardiovascular diseases**) to supply each of these **tissues, organs, systems** of a person's body with **oxygen** & **nutrients**, they will be suffocated and starve to death, resulting in the **death of the individual patient**. Remember that a python kills a person and other large preys such as a goat & a cow within minutes by suffocation of **cardiac arrest** before swallowing.

The reason for why **India** and **China** who are **superpowers** in the aspects mentioned in Figure 13 have been found to be **zero** in contributing **Greatest scientists** in creating sciences is because they are better effective in **businessizing** or **utilizing** the created sciences rather than in creating sciences for the world.

Feleke Eriso Orbalo is the **supergreatest** scientist who **removed** the **junk (Biology)** from & **added accuracy (Genomology)** to the world of **Natural Sciences**.

The **sun never sets** on **Ethiopian Empire of Genomosphere** that covers 100% of Earth's land & water surfaces forever with no rival and claimer.

The **Perfect Law of Genomology** which states that **Genome** is the **unit** of both **structure** & **function** in every individual of all genomic-things is a type of scientific law that will never be outdated, existing (valid & accurate) forever with the scientific world of human races wherever/whenever they exist.

The **Perfect Law of Genomology** also states that **Genome** is the **unit of evolutionary change**.

The **Perfect Law of Genomology** again states that **Genome (Pathogenic Genome or Cancerous Genome)** is the **unit** of both **structure** & **function** of **Masses of Autoinfected Cells (Benign Tumors, lumps of tissue, primary & secondary metastatic tumors including nontumor forming cancered cells)**, causing or resulting in **cancer**. Look! A type of tumor (a mass of cancered cells) such as that causes a **breast cancer** is an **individual genomic-thing** that

is pathogenic & invasive in the body of the patient (host) just like an intracellular pathogenic bacterium, a virus, or it is an individual complete organism like an individual person such as **Kebede, David, Mohamed, Zeberga, and Arega Semaga** where each of these individuals has its, his or her own synthesizer **Genome** which can be a **Normal Genome** or a **Cancerous Genome**. Being **cancered** can & does start in any one of the trillion of cells in our bodies.

The chemical composition of **Genome** of all genomic-things from that of viroids, viruses and microscopic organisms up to that of angiosperms and humans is the **same being composed (built or made up) of nucleotides**. It is because of this similarity in chemical composition that about 8% of human **Genome** is said to be that of virus combined with or inserted into compatibly as an autograft or isograft instead of being rejected as a xenograft or allograft.

Optionally, **cancered (autoinfected) cells** can be called **autogenous single-celled parasites** that may form lumps of tissue or colonies of its parasitic cells (i.e., malignant & metastatic tumors) in tissues and organs they invade, outcompeting for nutrients & space with their deathless rapid growth and cell division.

A **cancered cell** is a nonself, foreign & pathogenic organism in the body of its host (patient). This is the reason for why **Natural Killer Cells** and **Cytotoxic T Cells** detect and destroy, autoinfected (cancered) cells & cells infected with virus, similarly and by the same mechanisms of immune response in bodies of patients. A type of **cancer** is created by **pathogenic mutation** in the **Genome** of any one cell of its host.

As it has already been stated herebefore, a **Genomic-thing is defined as the product of reactions of its:**

► **Genome & its nutritive substances and minerals using sunlight-energy in the presence of chlorophylls as raw materials in its compatible environment** (in autotrophs or green plants), or

► **Genome & its chemical energy-containing nutritive substances and minerals in its compatible environment** (heterotrophs).

In other words, the **Genome** synthesizes itself and every individual genomic-thing of its kind using **sunlight-energy & its nutritive substances and minerals in its compatible environment** (autotrophs), or the **Genome** synthesizes itself and every individual genomic-thing of its kind using **its chemical energy-containing nutritive substances and minerals in its compatible environment** (heterotrophs).

 It is proved & concluded that **Biology** is a **set of fake (false) sciences** whereas **Genomology** is the **set of true sciences**.

 Based on the universal reactions of matter, reupdated confirmation with the best of truth:

▶ Superpower in **Best Controlled Quality Education** & in **Best Quality Reputable Journals** in the entire world is **UK** at present (with the publication fee being minimized down to £25 GBP in favor of global progress/development of science & technology),

▶ Superpower in **Medical & Agricultural Sciences** in the entire world is **India** at present,

▶ Superpower in **Economy** in the entire world by dethroning USA with an excess of giant difference is **China** at present,

▶ Superpower in **Nuclear Military Science** in the entire world is **Russia** at present, and

▶ Superpower in **Power of Mind in Genomological Sciences** in the entire world with no rival & claimer is **Ethiopia** forever, **being nondethronable** endlessly for countably infinite number of the future generations of all human races to come!!!!

 **Genomology** is a **Giant Ethiopian Science** of educational asset contributed to all human races of the world by dismissing **fake sciences of Biology** that have been paralyzing scientific progresses of student children as well as MSc & PhD students of all human races of this planet (Earth) for centuries.

 **Genomology** consists of:

▶ **pure genomology**,

▶ **genomotechnology**,

▶ **medical sciences**, flourishing from Genomology, and

▶ **agricultural sciences**, flourishing from Genomology.

 **Genomology** is a set of **supersciences** because:

▶ the automatic molecular machine called **Genome** that synthesizes all genomic-things is found in the system of **Genomology** only,

▶ the scientist himself who creates all sciences is synthesized by self-acting (automatic) genomic reactions only,

► out of the three types of **Universal Reactions of Matter**, the automatic reaction which occurs without the involvement of **human hands & minds** is only that of **Genomology**, and

► its automatic genomic reactions are miraculously complex.

Feleke Eriso Orbalo is the **Supergreatest Scientist** among all **Greatest Scientists** of the entire world.

Mike Tyson's top 25 greatest knockouts are metaphorically similar to how **true sciences of Genomology** knocked out or dismissed **fake sciences of Biology** from the world of meaningful Natural Sciences (Watch **Table 3**, 3rd row, video 1).
